

## WE DID

Another day's last breath without you  
and the riddle goes still unsolved  
I'd strike a candle and dream about you  
but I feel there's no light at all  
Take me back just one more mile  
Reassure me with your smile

When I remember all the things we did  
I'm torn between a tear and shifty grin  
Long for the days when not a care prevail  
We did it all - it seems as if a tale  
The mem'ry steals away like a thief  
I seize the moment knowing life is brief  
It always makes me feel I'm young again  
to reminisce about the things we did

My nerve and poise stood strong beside you  
What a wide world within our swing  
You looked after me, and sometimes I you  
Roam the town like a pair of kings  
Send me back just one more time  
Stoke the gathering with your mind

When I recall the magic turns we knew  
I reach the sky above, then hell below  
Halfway between dead end and giddy spin  
Long for the days when doubt we cast to wind  
I seize the moment because life is brief  
A glimpse of you with me, I'm over the grief  
It makes me feel just like a kid again,  
evoking scenes from all the things we did

When I recall the wondrous stuff we did  
I'm torn between heartache and silly grin  
I miss the days when not a care prevail  
We did it all - it seems as if a tale  
The mem'ry steals away just like a thief  
I seize the day because our lives are brief  
It always makes me feel I'm young again  
to reminisce about the things we did

I know you're watching and want to tell me  
For your wisdom it's never too late  
I say this now, lest my words fail me  
You're still here, in a different state  
Amplify the storyline  
Illuminate us with your shine
